Protocols

Your personal health protocol management system

User Guide · v1.0

SECTION 01

Getting Started

Protocols helps you organize, schedule, and track your entire health stack — supplements, medications, therapies, and nutrition — in one place.

Create Your Account

1. **Sign Up**
   Enter your name, email, and password to create an account.
2. **Set Location**
   Add your city for UV-based sunscreen guidance.
3. **Build Stack**
   Browse the catalog and add items to your personal protocol.

Your Four Tabs

The app is organized around four main views, accessible from the bottom tab bar.

Today

Your daily action plan — what to take, when, and what's done.

Protocols

Browse the catalog, manage your items, and build protocol stacks.

Nutrition

Macro profiles, named diets, elimination phases, and food rules.

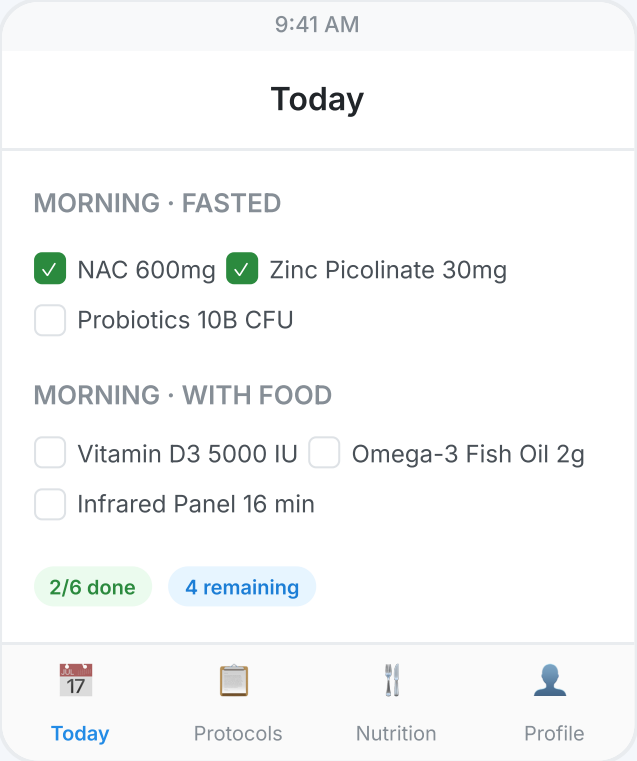
Profile

Your account, location settings, and preferences.

SECTION 02

Today — Your Daily Plan

Every morning, Protocols generates a personalized daily plan based on your active supplements, medications, therapies, and nutrition cycle.



Time Windows

Your day is divided into scheduling windows. Each item appears in the window you assigned during setup.

Morning Fasted	Before your first meal
Morning w/ Food	With breakfast
Midday	Around lunch
Afternoon	Post-lunch block
Evening	With dinner
Bedtime	Before sleep

💡 Swipe between dates using the date header at the top of the Today screen. You can look back at any past day to review adherence.

Smart Cards on Today

⚠️

Interaction Warnings

Automatically flags supplement and medication interactions based on AI profiles.

☀️

Skincare Guidance

UV index and sunscreen reminders based on your saved location.

📈

Tracking Summary

14-day adherence trend showing your consistency over time.

SECTION 03

Protocols — Your Health Stack

The Protocols tab is your command center for managing supplements, medications, therapies, and protocol stacks.

Three Pillars

Everything in your health stack falls into one of three categories:

💊

Supplements

Vitamins, minerals, adaptogens, and nutraceuticals with AI-generated profiles covering dosing, timing, interactions, and synergies.

💉

Medications

Prescription and OTC medications including topicals. Track dosage, frequency, and monitoring notes.

🔮

Therapies

Devices, treatments, practices, and routines — from cold plunges and saunas to meditation, skincare, and training sessions.

Therapy Categories

Therapies span a wide range of health domains, organized by category:

🔥 Thermal	💡 Light	🏃 Movement
🌬️ Breathwork	⚡ Electrical	🤲 Manual
🎵 Sound	✨ Skincare	💇 Haircare
🩹 Recovery	🧠 Cognitive	⚫ Other

How to Add an Item

1. **Browse**
   Search the catalog or scroll categories on the Protocols tab.

→

2. **View Profile**
   Tap an item to see its AI-generated profile with dosing, timing, and interactions.

→

3. **Add & Schedule**
   Tap "Add to My Stack" and configure your personal dosage, frequency, and time window.

SECTION 04

Protocol Stacks

Group related items into named stacks for organized protocol management.

What Are Stacks?

A protocol stack is a named collection of supplements, medications, and therapies that work together toward a specific goal.

📚 Sleep Stack

Magnesium Glycinate + Ashwagandha + Muse Meditation + Box Breathing

Active

💪 Performance Stack

Creatine + Zone 2 Cardio + EMOM Pull-Ups + Compression Boots

Active

✨ Skin Protocol

Retinoid + LED Face Mask + Gua Sha + Microneedling + Infrared Panel

Scheduled

💇 Hair Protocol

Finasteride + Minoxidil + Dermaroller Scalp + LED Hair Cap

Active

✓ **Tip:** Items can belong to multiple stacks. Your "Morning Fasted" supplement might appear in both your Sleep Stack and your Performance Stack.

Stack Activation

Stacks can be **active** (items show in your daily plan), **scheduled** (will activate on a future date), or **inactive**. Toggle stack status to quickly enable or disable entire protocols without losing your configuration.

SECTION 05

AI-Powered Profiles

Every supplement and therapy in the catalog includes a detailed AI-generated profile to help you make informed decisions.

What's in a Supplement Profile?

SECTION	WHAT IT TELLS YOU
Mechanism	How the substance works in your body at a biochemical level.
Dosages	Typical dose ranges for different goals (maintenance, deficiency, performance).
Timing	Best time windows, whether to take with food, and what to avoid.
Interactions	Known interactions with medications and other supplements with severity levels.
Synergies	Beneficial pairings and why they work better together.
Cycling	Whether periodic breaks are recommended and suggested patterns.
Safety	Contraindications, side effects, and safety considerations.
Evidence	Quality rating (strong/moderate) with key research citations.

Therapy Session Templates

Each therapy includes a session template with recommended duration, frequency, and step-by-step instructions. Customize session settings when you add a therapy to your stack.

🧊 Cold Plunge

Default: 5 min · Daily · Morning
Template: 2-5 min full immersion at 3-7°C

💡 Infrared Panel

Default: 16 min · Daily · Morning
Template: 4 min per side or 5 min front-only block

SECTION 06

Nutrition Plans

Create and track macro profiles, named diets, elimination phases, and custom food rules alongside your supplement and therapy protocols.

Nutrition Cycle Types

🍆

Standard Diet

Set daily macro targets (protein, carbs, fat) and caloric goals.

🔥

Cut / Bulk

Caloric surplus or deficit phases with target macros and duration.

🔬

Elimination

Track food sensitivities with systematic elimination and reintroduction.

Phase Tracking

Nutrition plans appear in the Today screen's nutrition phase card, showing your current cycle status, days remaining, and macro targets. The app tracks active vs. completed cycles so you can review your nutrition history.

SECTION 07

Adherence Tracking

Monitor your consistency and build healthy habits with built-in adherence tracking.

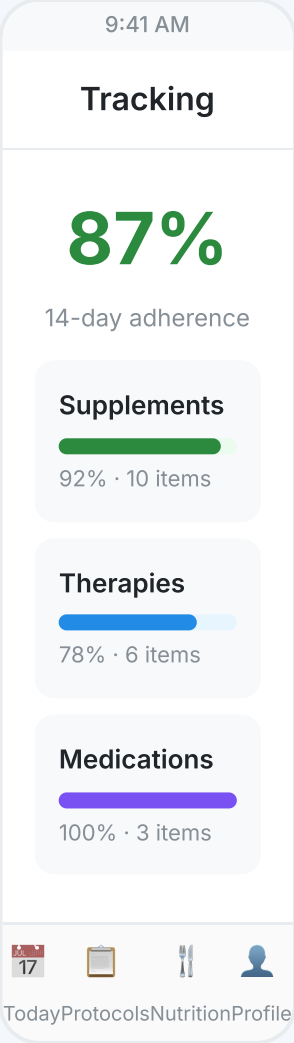
How Tracking Works

When you check off an item in your daily plan, an adherence event is recorded with a timestamp. The tracking summary card on Today shows your rolling 14-day adherence rate.

> 📊 Tap the tracking summary card to see a detailed breakdown of adherence by item, category, and time window.

Cycle Alerts

For supplements with cycling recommendations (like Ashwagandha's 8-on/2-off pattern), the app tracks your cycle position and alerts you when it's time to take a break or resume.



SECTION 08

Profile & Settings

Manage your account details, location preferences, and app settings.

Your Profile

📍

Location & UV

Save your location to receive UV index-based sunscreen guidance on the Today screen.

🔔

Notifications

Configure reminders for supplement timing, therapy sessions, and cycle alerts.

🔓

Account

Update your name, email, and password. Sign out or manage your session.

⚠️ **Important:** Protocols is a personal tracking tool, not medical advice. Always consult a healthcare professional before starting, stopping, or modifying any supplement, medication, or therapy regimen.

SECTION 09

Quick Reference

Common actions at a glance.

I WANT TO...	HOW
See what to take today	Open the **Today** tab
Add a new supplement	Protocols tab → search or scroll → tap item → **Add to My Stack**
Change a dosage or schedule	Protocols tab → My Items → tap item → **Edit Schedule**
Create a protocol stack	Protocols tab → Stacks section → **+ New Stack**
Mark an item as done	Today tab → tap the checkbox next to the item
Check my adherence	Today tab → scroll to **Tracking Summary** card
Set up a nutrition plan	Nutrition tab → **+ New Plan**
Check UV / sunscreen need	Today tab → **Skincare Guidance** card (requires location)
Pause a supplement	Tap item → toggle **Active** off (keeps your schedule saved)
Flag item as out of stock	Tap supplement → toggle **Out of Stock**
See interaction warnings	Today tab → **Interaction Warnings** card (auto-generated)
Review a past day	Today tab → tap date header → navigate to desired date

Built with care. Not medical advice. Always consult your healthcare provider.
